The Genesis series of karts are very popular and have been in production since the year 2000. This kart offers track owners a long life of operation with minimal attention and repair, which makes it an exceedingly cost effective kart to function with and grow your business on.

Our latest rental kart on the SX platform is the Genesis SX6. The Genesis SX6 is essentially the Genesis SX4 but also with the latest CIK safety recommendations such as a Roll Hoop, floor mounted steel fuel tank with fuel pump and a Four Point Seatbelt.

For the feature list and specifications visit: <http://www.knkkarts.com/sx6.html>

Features of the new KnK Genesis SX6

- ✓ Chassis – Better structural strength and durability than the Genesis SX4
- ✓ New Floor Layout – Easier to get in and out of. Tidy looks. Easy to clean and service.
- ✓ Seamless Guardrail design – Well integrated into the body work for a clean and fresh look.
- ✓ Safety – Roll Hoop – In keeping with the latest recommendations outlined by the CIK for rental karting.
- ✓ Safety – 4 point Harness – Keeps the driver strapped safely in the seat. Roll hoop stay bar prevents whiplash.
- ✓ Safety – Floor mounted metal fuel tank (Picture shows plastic tank)
- ✓ Light and responsive steering – A characteristic well associated with KnK Karts
- ✓ Can accommodate a GX200 and GX270 engine with a heavy duty reduction gearbox
- ✓ Brake Light and Electric start now an additional (optional) feature
- ✓ Shares the same parts – Almost all the componentry have been carried over from the Genesis SX4

We pride ourselves of having a wide range of karts for almost every karting application there is. We also take on tailor made orders to suit your ideas and requirements. KnK karts are exported to several countries
