The world is going Off-Road! Year on year we are seeing an increasing interest towards riding trails. "Adventure" is the name of the game. The fraternity looking at exploring new trails and tracks, is experiencing a level of popularity never witnessed before.

At KnK we have our fingers on the pulse of things and we are constantly on the lookout to develop affordable solutions to new demands and requirements. Mobility to travel over challenging terrain and the desire to reach new destinations is the demand of the thrill seekers today.

Adding to the growing stable of KnK buggies is the KnK Sidewinder. Manufactured by our sister concern Pipe Accessories Mfg. Co. under strict quality control by Karts 'n' Kitcars (P) Ltd., The KnK Sidewinder is the new addition that permits you to take along a companion to share the excitement of your adventure.

Please click on the link below to read more about KnK Sidewinder.

The latest addition to our ATV lineup is the Sidewinder. Based on the popular Mudslinger which is a single seater version, the Sidewinder is a two seater which offers the driver and passenger the same amount of performance, safety and fun.

### **Suspension**

The Sidewinder uses independent single “A” arm front suspension with ride height adjustability. The rear has a swing arm wherein you can also adjust the ride height depending on the type of terrain that the vehicle is being driven on. You can fine tune the suspension further by adjusting the spring preload for each shock absorber unit.

### **Brakes**

The brake is a disc brake to the rear wheels. You also get a parking brake so you can park it wherever you like.

### **Engine and Transmission**

The Sidewinder comes with two engine variants made by Honda. The 200cc does the job exceedingly well however, if you are looking for that extra Oomph, then you have the choice of ordering your Sidewinder with a 270cc engine. The engines produce 6.5 and 9 horse power respectively. The engines are coupled to a Constantly Variable Transmission (CVT).

The Sidewinder Pro has the added benefit and convenience of an electric start and reverse gear to get you out of sticky situations.

### **Lights**

The Sidewinder Pro is fitted with bright LED headlights up front and a reverse light and a taillight at the rear.

### **Safety**

The strong and sturdy roll cage protects the occupants from injury in case of a roll over. The Sidewinder is fitted with 4 point harnesses that secure you and your passenger. Both occupants also have wrist restrainers to protect arms from getting injured in a roll over.
