

Over the past three months we have been working very closely with India's busiest karting track, Torq03, where we've been conducting a testing program with electric karts that we are currently developing. Torq3 is at E-Zone, one of the city's most popular entertainment destinations located at Marathahalli in Bangalore.

Torq03 has a tremendous footfall with waiting times sometimes extending to over 3 hours on the weekends. Track owner Harsha along with his very capable team led by Taha, prioritise safety, alongside an awesome karting experience. 20 karts on track while another 20 karts are simultaneously being loaded for the next session, this is a sight you will see from the morning, right through the day and into the night.

15 years in the business and they still maintain exceptionally high levels of quality, cleanliness, safety along with a fantastic user experience, these are Harsha's priorities towards his patrons. It was a no-brainer to decide to test at Torq03, Harsha has been very encouraging and very accommodating. He is an important cog in the wheel of this electric kart project.

Be sure to visit Torq03 when you're in the city next, it is a destination worth getting to, despite the challenges you will face with the notorious Bangalore city traffic.

KnK Karts are working in association with Electric power-train developers - ElettriCo to develop a world class electric kart for the global market.

## ***Karting comes to Assam!***

Abhijit Warisa of JR Karting situated at Warisa Estate, has just picked up his stable of karts for his track, situated way north in the plains of Assam.

Abhijit is a motorsport enthusiast and one of the warmest and friendliest people we have met. He is an automobile aficionado with a tremendous flair for entertainment as well as competition karting. You will clearly see his passion for the industry, and we wish him the best always. We will have more news from JR Karting in the coming newsletters.

## ***New developments at the factory***

In the previous month's newsletter, we talked about the several new developments on going at KnK. One of the developments is the updated version of our twin seater kart, the Genesis TS8 which is now updated and as rebadged as the Genesis TS22. The Genesis TS has been a popular twin seater rental kart and in its latest avatar, it features increased safety and a better driving experience. The kart now has twin roll hoops, twin seatbelts, a new looking body kit with updated decals and a reworked steering geometry for very tight circuits. Do check this out during your next visit to a karting track.

***Until next time, see you round the corner!***

***Ishaan Singh***
